

ROTATING SCREEN

As auxiliary machine of continuous pulpers slushing waste paper, the ROTATING SCREEN is used for Turbowasher rejects handling and for process water recovery. Combined with other machines (Ragger, Turbowasher, Rope cutter), the ROTATING SCREEN is essential part of continuous cleaning systems of low density pulpers. In addition all the parts in contact with water and rejects are manufactured in AISI 304 stainless steel, the drive system and all the mechanical components have been designed for easy and economical maintenance, the filter basket rotates on plastic slides.
