

VERTICAL PULPER SP

The VERTICAL PULPER SP is designed to slush both waste paper and virgin pulp at low consistency, it is manufactured in several sizes according to line production (vat capacity from 10 m³ to 40 m³) and it is suitable for both batch and continuous operation if equipped with the necessary machines (Turbowasher, Ragger, Rotating screen, Rope cutter) for continuous stock cleaning and rejects handling

The VERTICAL PULPER SP is designed with a tested, simple and reliable propeller group for both setting and maintenance and can be equipped with the necessary accessories and auxiliary machines for any specific installation.
